FAQ ON ZONER DRAW 4

How do you get the Menus to appear? - Click View - Toolbars - Select all of them.

Where do I get the Clipart? - You can download the Clipart from http://www.zoner.com look for the clipart menu.

How do I get BMPs to Auto Trace? - You cannot AutoTrace BMP's use .WMF files

I can't get my WMF files to Work after I have converted them from BMPs - You cannot use converted WMF files that are converted from BMP's. You must use original WMF files.

I cannot get the clipart to work I don't know if I upzipped it in the right place? - After downloading the clipart open a New Folder called Zoner Clipart and unzip the clipart to this folder you can then either import the images as you need them or Browse in the Symbols Menu for them.

I can't get my TT Fonts to show in the Right menu. - Right click in the Symbols Menu and uncheck Symbol Fonts Only.

I can't get my Images to import to my Work Area. - When you import you need to draw an area with the Cross+Paper Icon on your Work Area where you want the image to appear.

How can I get a larger work area to work on? - Hit the F9 Key to Hide your menus and use Full Screen Mode. Hit the F9 key again to bring the Menu's back.

Why Can't I see any Objects on the Left Menu?   - You must click on the little black triangle in the right corner of the object button hold down the left mouse button and drag the menu to the right.

After importing a bitmap file in Zoner 4, how can I get the blue fill around the design? - You can't AutoTrace BMP's

Why are the clipart icons on the Symbols Menu so Small? - Right click in the Symbol Menu and select Preview Size - Small - Normal or Large.

What formats will work in Zoner Draw 4? - You can import all different formats into Zoner but the .WMF files work the best for Auto Tracing because they are Vector Images.

Does the Bonus Clipart come with the Trial Version of Zoner Draw 4? - You receive the Bonus Clipart when you purchase the Registered Version.

How do I import more fonts , there are not many listed? - You can use any TTFonts you have installed in your Windows Font collection on your computer. You can download Fonts from various sites on the Internet.

How do you get the Images from the Right Menu to the Work Area? - You can Double Click on the Image or Font, or Right Click and Select Insert, or Drag and Drop it on the Work Area.

How did you get the AutoTrace Blue Line to work? - You need to open the Pen Menu, Select the Straight Line, Change the Color to Blue, change the Line Width to between 0.60mm and 1.20mm (depending on the image you are using) and then click the green Check Mark.

How do you get the image colors to be white? - Open the Fill Menu and change Fill Type to Solid and fill color to White and click the Check Mark to activate the fill.

My Clipart isn't showing - At the top of the Main Menu you have a Menu with: An eye, A Lock, A Printer and the word Main. Make sure the eye is on or you wont see anything on the Work Area because that Layer is turned off. Make sure the Lock is Off. Make sure the printer is On.

Why do I get double lines on some of my Images when I AutoTrace? - Double lines will appear on clipart that has a thick outline. The AutoTrace will pick the inside and outside lines of the thick line.20.

How do you get the AntiAliasing to work? - Go to View- Redraw Quality and Check the AntiAliasing.

How can I open my Corel Draw 8 Images? - Corel uses CDR extension
also for its special exchange format. I do not know why they did this, but the internal structure of this file is not CDR but CMX. That is why Zoner Draw is unable to open it. If you have CorelDraw save it (using Save as) to original CDR version 8 and it will work.

Whats the difference in BMP and WMF Images? - BMP's are pixel images made up of little squares. .WMF are mathmatical (algorithm) images and when resized etc the mathmatical equation is recalculated. (Thus no loss of quality in the image.)

Can I only use Clipart that came with Zoner Draw 4? - No you can use any Clipart as long as it is an original image and not a converted image.

Can I use the Clipart that came with Zoner draw 4 for digitizing? - Yes you can but please include a Text File specifying where the original Clipart came from.

Can the Clipart be used in another clipart collection? - NO they cannot be used with other clipart collections and please read the Copyright information on the Zoner Website http://www.zoner.com

What format will I receive my Clipart in? - You can choose between .zmf and .wmf.

How do I get the Clipart? - You will be able to download the Clipart and depending on the format the file size is between 50MB & 70MB.

If I get the Clipart in .zmf format will I be able to AutoTrace? - Yes just export as .wmf and Import it back into Zoner Draw 4 again.

Do you get anything else with Zoner draw 4? - Yes you get a Viewing Program that is great to have running in the background to get a larger view of the clipart images.

Can you use Winding and Dingbat Fonts with the AutoTrace function? - Yes you treat them like other images when you AutoTrace. You may have to increase the Line thickness.
